

DENARIUS PUMPING SERVICES DE VENEZUELA, C.A

SERVICIOS ESPECIALIZADOS

Company
Brochure

30 AÑOS

Brindando Servicios Especializados a Pozos de Petroleo y Gas

30 Years of Proven Capacity and International Regulatory Rigor.

29

Nearly 30 years of experience in the Oil Industry, offering Specialized Oil Well Services.

Company with Solvent Assets

+7 sets

+7 Cementing Sets, Gravel Packing, Stimulation, Fluid Pumping and more than 97 Direct Employees.

+50 Contracts, Commercial Alliances and Strategic Alliances Executed to the Satisfaction of Our Clients.

Company with OFAC Specific License since 2021, valid until April 2025, and in the process of renewal.

2 Operating Bases

+2 Operational Bases, with Offices, Laboratory, Cement Plant, Workshops and Warehouses.

\$120 Million

+120 Million in Contracts Executed to Our Customers' Satisfaction.

+4,000

+4000 Interventions in Oil and Gas Wells

Chevron

First Venezuelan Company to sign a contract with Chevron for High Pressure Pumping, Stimulation and Cementing of the Transnational Companies like Halliburton, Schlumberger and Baker Hughes.

Corporate Structure, Permits and Licenses to Subscribe to and Execute Oil Projects.

- ◆ **SOCIALIST CEMENT CORPORATION :** CCA002486
- ◆ **COMMERCIAL ACTIVITY :** Specialized Oil Well Services.
- ◆ **CORPORATE PURPOSE :**

The Company's purpose is to execute specialized services to oil and gas wells, covering the areas of High, Medium and Low pressure pumping; primary and secondary cementing, chemical stimulation, gravel packing, line displacement, fluid filtration, hydraulic fracturing, drilling fluid design and laboratory testing, drilling and maintenance of water wells, drilling and maintenance of oil and gas wells, service to wells with continuous tubing unit, suction of hydrocarbons and other fluids, cleaning and maintenance of hydrocarbon pits and related activities, supply, testing and conditioning of oil and gas wells, maintenance and repair of rehabilitation and drilling tubing, transportation and storage of fluids, management of oil and gas fields, supply of specialized equipment and tools for the oil industry and related activities, rental of equipment and machinery, construction of facilities for oil well pads and related activities, procurement, engineering and construction projects; as well as activities related to the import and/or export of petroleum industry products, and may also carry out, organize, establish and operate industries, factories and representations of all kinds, participate in other civil or commercial companies as a partner or shareholder, act as a representative of national or foreign commercial firms, and finally, may carry out any other lawful commercial act. This list is merely illustrative and not exhaustive, and consequently, the Company may engage in any other lawful activity and/or business, as decided by the General Shareholders' Meeting."

We Offer Comprehensive, High-Level Technical Solutions Designed to Maximize Reservoir Recovery for Our Clients.

Oil Well Stimulation

Oil Well Cementing

Gravel Packing

High, Medium and Low Pressure Pumping

Filtration of Completion Fluids down to 2 microns

Fluid Transport and Storage

Workover Activities

Operational Reliability in Surface Facilities

Engineering, Procurement and Construction

Strategic Partnerships and Agreements transform Denarius into a World-Class Technology Center.

Downhole Tools - Float Equipment

Strategic Alliances with Manufacturers and/or Distributors of Rigid and Flexible Centralizers, Top/Bottom Plugs, Float Shoe, Float Collar, Check Valves, among others.

Chemical Additives

Strategic Alliances with Manufacturers and/or Distributors of Chemical Additives for Cementing Slurries and/or Oil Well Stimulation Treatments.

Strategic Alliances and/or Representations

Master Services Agreement (MSAs) with Chevron Global Technologies Company and Authorized Channel Partner of Baker Hughes for High Pressure Pumping, Stimulation and Cementing of Oil Wells services.

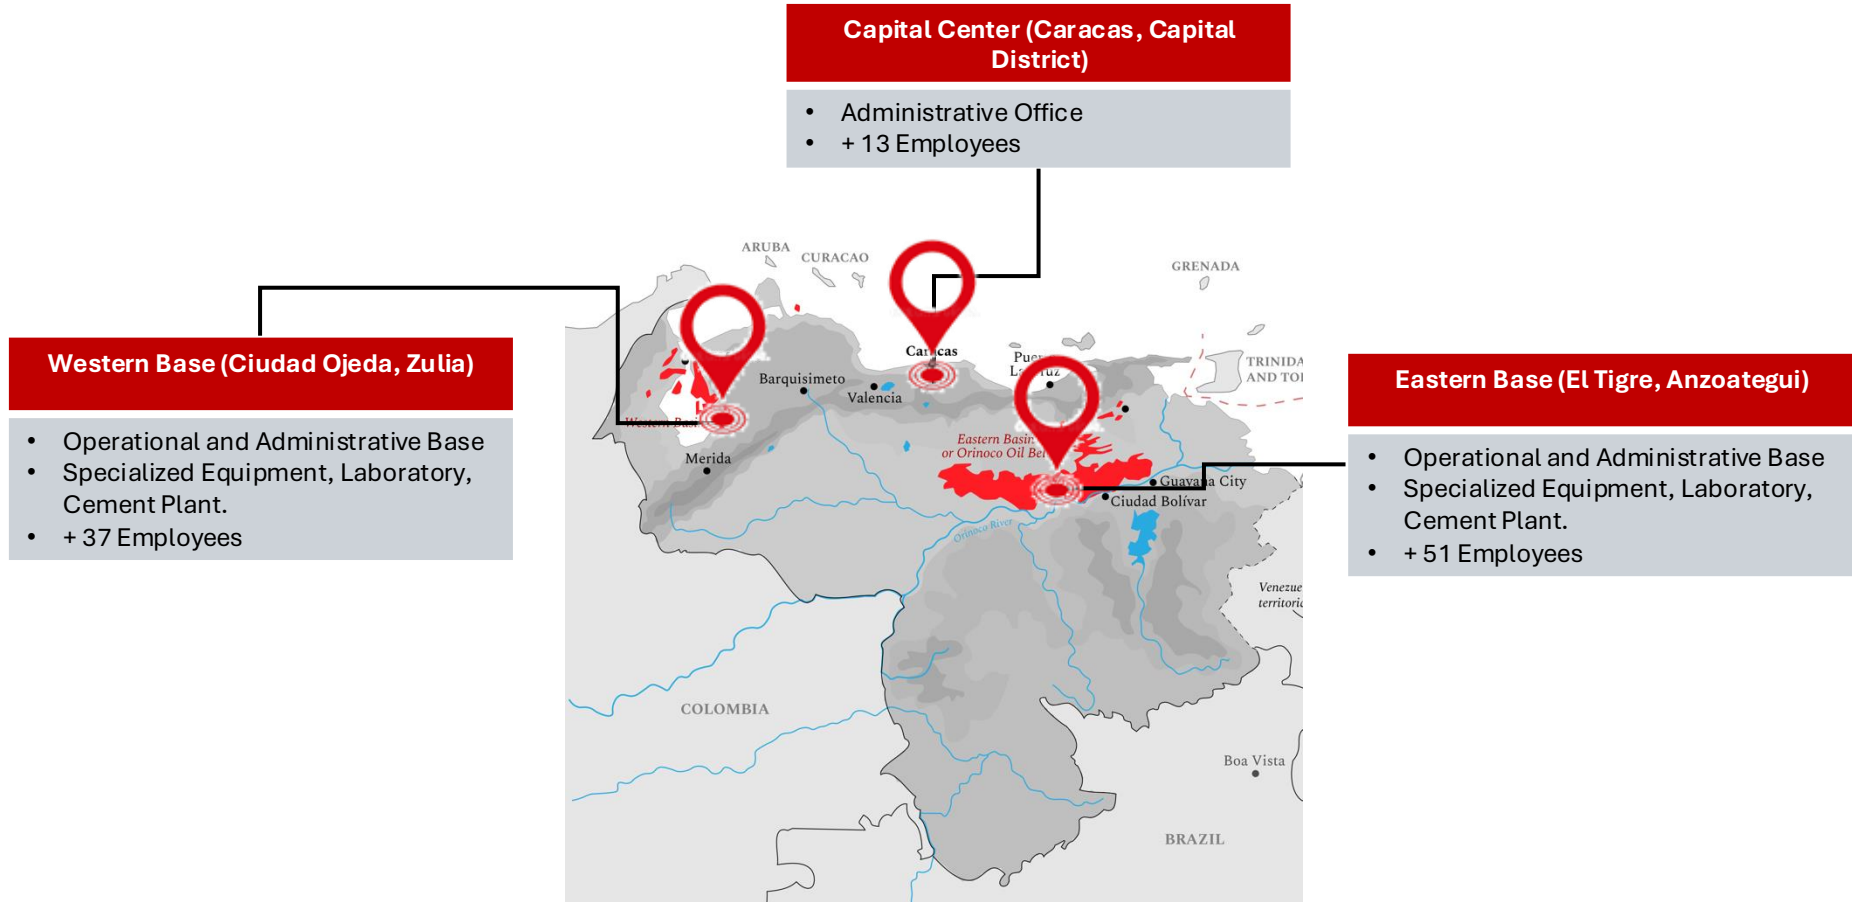

Upstream and Downstream equipment

Strategic Alliances with International and Local Manufacturers and/or Distributors of Supplies, Materials and Spare Parts for the Oil Industry.

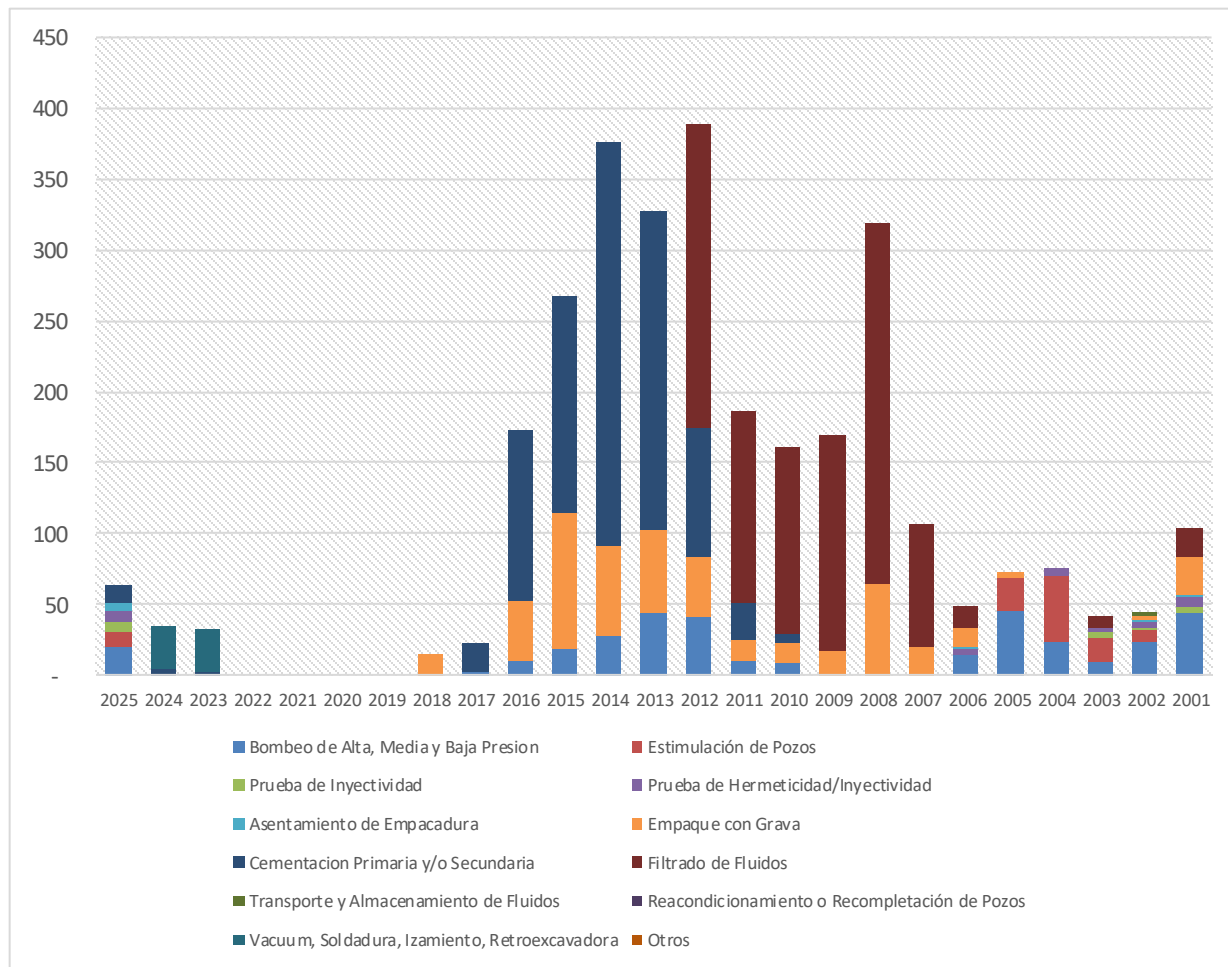

Unparalleled local presence, permanently positioned in Venezuela's main energy basins.

Nearly three decades of operational excellence and consistent service delivery.

- ◆ A proven track record of over 29 years and more than 4000 interventions in oil and gas wells.
- ◆ Consistent Execution of Complex Interventions through the different market cycles.
- ◆ Stability and Resilience, providing specialized oil well services to the state oil company (PDVSA) as well as to PDVSA Joint Ventures, as well as to Private Operators.
- ◆ Extensive Line of Specialized Oil Well Services.
- ◆ Compliance with National and International Regulations.

The Trusted Strategic Partner for State Entities, JV's Companies and International and National Energy Operators.

Market Share Analysis: Specialized Oil Well Services in the Area of High Pressure Pumping, Stimulation and Cementing in Venezuela.

The Venezuelan market for cementing, gravel packing, stimulation, and high-pressure pumping services currently exhibits a segmented market structure due to the international regulatory framework and the nature of the operators. In the segment dominated by multinational companies with specific OFAC licenses—such as Chevron, Repsol, Eni, Maurel & Prom, and Shell—the market share will be led by global providers like Halliburton, SLB, and Baker Hughes, along with strategic players such as Denarius Pumping Services, whose binational structure and OFAC license provide it with a competitive advantage in compliance and execution.

On the other hand, the activity driven directly by PDVSA, Joint Ventures, and the new CPPH schemes will be led by an ecosystem of service companies with solid local installed capacity, including Denarius Pumping Services, Tucker Energy Services, Vencana, PetroAlianza, Servicios y Suministro de Oriente (SSO), Petrolera Álvarez, S&B Terramarine, Sepesa, Newsca Pumping Coiled Tubing Group S.A., Roraima Servicios Petroleros S.A., Integra Well Services C.A., and Oiltools Internacional. According to internal sources and PDVSA projections, this second group, along with new emerging companies, will capitalize on the national operational reactivation thanks to their immediate asset availability and technical expertise adapted to the current challenges of the Venezuelan basin.

Source: PDVSA VP Engineering and Planning

Company	Market Share	Role in the Segment
SLB (Schlumberger)	 35%	Leader in Technology and Software
Halliburton	 30%	Leader in Cementing and Stimulation
Baker Hughes	 15%	Completion and GP Specialist
Denarius Pumping Services	 12%	Local Strategic Partner with OFAC License
Others	 8%	Specialized Niche Companies

A nighttime photograph of an industrial site, likely an oil field. In the foreground, several workers in blue and red uniforms and hard hats are visible. A large white truck with a pump unit is the central focus. The truck has '15 BBL' written on its side, a logo of an oil rig, and the text 'DENARIUS PUMPING SERVICES' and 'DPS-OP1-CMB-'. The background shows more industrial structures and equipment under artificial lighting. A semi-transparent white box with red text is overlaid on the image.

Let's continue building and generating value for the Venezuelan oil industry.

Denarius Pumping Services is fully prepared, authorized, and equipped to immediately execute PDVSA Service Contracts, Productive Participation Contracts (CPPH), and Joint Ventures..
